ALLEGANY COLLEGE OF MARYLAND BUSINESS ADMINISTRATION

Quentin Adams
"I began volunteer work at a very young age, helping my grandmother at a local nursing home on the dementia floor starting around age six. I continued this for several years and also participated in Cub Scouts beginning in first grade, remaining active in scouting and volunteer efforts all the way through to earning the rank of Life Scout. While I don't have a specific job title in mind, my ultimate employment goal is to positively impact every company I'm a part of. I'm driven to be a force for improvement and meaningful change in the business world. After graduating with my associate degree this May, I will be continuing my education at Frostburg State University to pursue a Bachelor's in Business Administration, with plans to follow that with a master's program. I'm also preparing for a personal milestone—marrying my wonderful fiancée, Skyler McKenzie, in the spring of 2027. What sets me apart from others is my perspective as a non-traditional student is that I've spent nearly a decade in the workforce, gaining firsthand insight into what needs to change in today's industries. I'm highly motivated, deeply determined, and have built myself up from the ground, despite being told I'd never succeed. I'm proud of how far I've come, and I'm even more excited about the contributions I can make to the world moving forward."

ALLEGANY COLLEGE OF MARYLAND BUSINESS MANAGEMENT

Anthony DeBonis
Throughout my time at Allegany College of Maryland, I've been fortunate to learn from such dedicated faculty members who have consistently challenged and supported me. This recognition means a great deal, not only as a reflection of my academic and extracurricular efforts, but also as a testament to the mentorship I've received from all of ACM. I am the Office & Logistics Manager, and also doing sales too at Structural Fiberglass in Bedford, PA! I would like to own my own business one day, preferably in the entertainment industry. Otherwise, I am just kind of learning tricks of the trade for now, I would like to build a reliable skillset before I make any investments in myself of that size.
